

Environmental Policy

Saba Infrastructure, as an operator of car parks and regulated parking zones, has the principal goal of providing its clients a high **quality service** based on **sustainable development** criteria that ensure the appropriate management of resources, protection of the environment and satisfaction of our society's demands.

To this end, Saba operates by improving **energy efficiency**, ensuring good **waste management** and fostering **sustainable development**, always meeting the legal frameworks in force, our own corporate social responsibility policy and other commitments that may arise. We work hard to **minimize our impact on the environment** as much as possible.

As we strive for our **continuous improvement**, the company's goal is to intensify our environmental management, investing some of our resources in **maintaining and renovating** our facilities as well as implementing an ongoing **training programme** for employees and maintaining a high degree of environmental **awareness** that will have direct benefits for the quality of service that we offer our clients.

The Management at Saba undertakes to review this policy periodically, adapting it to any needs that may arise. It shall be accessible to anyone interested and will be distributed among all of its employees and contractors, as well as being made available to our clients and to the general public.
