

Risk Prevention Policy

Saba Infrastructure views **risk prevention** in the workplace as one of its top-priority **strategic goals**, as well as a commitment to fulfil in all our activities. We work on the fundamental principle of protecting the health and safety of all of our workers, both our own employees and those of any partner companies as we do our work as an operator of car parks and regulated parking zones.

Saba's actions are not based simply on meeting **health and safety regulations**, but on exceeding the minimum legal operations to achieve **maximum efficiency** through our **continuous** process of **improving** health and safety conditions in workplace. To this end, Saba periodically reviews and adopts any necessary measures and promotes **advance assessment of potential impacts** on the health and safety of people working in our facilities, be they our own staff or contractors from outside Saba.

Everyone working at Saba receives suitable training and information adapted to the work they do, so that they are able to fulfil their duties while avoiding unnecessary risks and making a positive contribution to risk prevention, encouraging the effective involvement and participation of everyone.

The Management at Saba undertakes to review this policy periodically, adapting it to any needs that may arise. It shall be accessible to anyone interested and will be distributed among all of its employees and contractors, as well as being made available to our clients and to the general public.
